We help you implement, customize, update and enrich your repository with advanced services.

We empower knowledge sharing and collaboration to help you generate solutions for social good and innovation

DSpace is the most widely used open-source software for repositories with more than 3000 installations around the world. At 4Science we love to be Platinum Certified Providers and leading contributors of DSpace.

DSpace-CRIS an open-source platform, enhances DSpace by enabling structured management and sharing of research information like outputs, grants, projects, and affiliations. Its flexible architecture and customizable data model offer advanced services for streamlined research governance, strategic activities, and increased institutional prestige through effective tracking, funding application, and Open Science dissemination.

DSpace-GLAM an open-source DSpace extension, caters to cultural heritage institutions like archives, libraries, museums, and galleries. Offering a comprehensive platform, it facilitates the preservation and dissemination of diverse digital assets, including photos, documents, videos, and audio recordings. DSpace-GLAM seamlessly integrates various archival metadata standards and add-ons, making it the perfect solution for managing and showcasing cultural heritage collections.

Dataverse is the Harvard-born solution to share, preserve, cite, explore, and analyze research data. Our team contributed to the software to be deployed on AWS and implemented the OpenAIRE guidelines for data repositories.

IIIF IMAGE VIEWER: Use the best international standard to work with image collections and enjoy them.

DOCUMENT VIEWER: Explore, access and work on full documents.

OCR MODULE: Promptly find the information you need from your digitized documents.

AUDIO/VIDEO STREAMING: Simplify access and reuse of audio/video content.

ANALYTICS&REPORTING: Powerful set of tools for Data Analysis, Reporting, and Data Visualization.

UX PLUS: Enhance the user experience with a modern and intuitive interface to access and interact with digital content.

CONTENT&USAGE STATISTICS: Monitor how users interact with the repository and create charts representing content.

DATA QUALITY: Check and manage duplicates and create a duplicate-free repository

NETWORK LAB: Create dynamic graphs to uncover unforeseen connections among individuals, documents, projects, events, organizations, places, and more.
